Waterloo, ON, Canada | h72lee@uwaterloo.ca | linkedin.com/in/hyoseo-lee | github.com/hyoseo837 | hyoseo.dev

EDUCATION

University of Waterloo

Waterloo, ON

Bachelor of Computer Science, Honours, Co-operative Program

Sep 2023 – Present

- Transferred from Honours Math to CS after 1st year; 92.33 cumulative GPA
- Relevant Coursework CS 245 (Logic and Computation), CS 246 (OOP), CS 240 (Data Structures and Algorithms), CS 341 (Algorithms), STAT 230 (Probability), MATH 239 (Combinatorics)

TECHNICAL SKILLS

Languages	Python, C, C++, JavaScript, TypeScript, HTML/CSS, SQL
Frameworks	React, FastAPI, Astro, Pandas, Matplotlib, Expo, Gemini API
Tools & Platforms	Git, Docker, Ubuntu, AWS (EC2, RDS), DigitalOcean, Cloudflare Pages, PostgreSQL
Languages (Human)	English (Fluent), Korean (Native)

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900)	Jun 2024
Microsoft Certified: Azure AI Fundamentals (AI-900)	Jun 2024

EXPERIENCE

WE Accelerate — Azure & AI Stream

Remote

Microsoft-mentored Co-op Program | University of Waterloo

May 2024 – Aug 2024

- Designed an Azure AI pipeline for a medical diagnosis chatbot in a team-based Microsoft-mentored program; earned AZ-900 and AI-900 certifications

Republic of Korea Army (ROKA)

Gyeonggi, South Korea

Squad Leader & Fuel Supply Specialist | Mandatory Military Service

Oct 2024 – Apr 2026

- Led squad of 14 soldiers and managed fuel logistics operations during mandatory military service

PROJECTS

CxC Hackathon — Wildfire Analysis | Python, Pandas, Matplotlib, ML |

Feb–Mar 2024

- Analyzed 22,000+ Alberta wildfire records; built an AI model to predict wildfire sizes using multiple ML algorithms such as linear regression, random forest, neural networks.
- **Won the MEF Award** for impact analysis on indigenous communities.

Dchup — Flashcard Web App | React, FastAPI, AWS (EC2, RDS), PostgreSQL, Netlify |

Mar–Jul 2024

- Architected and built a full-stack Quizlet-like flashcard platform from scratch, implemented RESTful API with Python FastAPI, and user auth, flashcard CRUD, and study modes on a React frontend.
- Deployed backend on AWS EC2 with PostgreSQL RDS database and frontend on Netlify; implemented CI/CD pipelines for both

Macro Dashboard | React, FastAPI, PostgreSQL, Docker, DigitalOcean |

Apr–May 2026

- Designed and deployed a production-grade customizable financial dashboard with drag-and-drop asset price widgets, sparklines, and live RSS news feeds from 22 sources.
- Deployed on DigitalOcean via Docker Compose with Caddy reverse proxy and auto-HTTPS; automated price and news refresh with background scheduler.

Waterloo Works AI Assistant extension | JavaScript, Chrome Extension MV3, Gemini API |

May 2026

- Built and submitted to Chrome Web Store: a Manifest V3 extension that scores WaterlooWorks co-op postings against a user's CV using Google Gemini, injecting inline verdict badges into the job table.
- Engineered a page-bridge script to reuse session cookies and CSRF tokens from the host page, enabling authenticated posting fetches that content scripts alone cannot perform.
- Optimized cost via Gemini's server-side context caching — full job-board scans run at well under \$0.0003 USD per posting on gemini-2.5-flash
